

# CROCKER art museum

## CROCKER ART CAMP My Planet Earth Wednesday, August 7

While focusing on our Planet Earth, Campers are learning the importance of caring for our world and making art-works that focus on specific climates, environments, and animals.

Campers have been keeping busy exploring a variety of materials and creating small works of art for their Tropical Rainforest installation. Making mountains, trees, tropical birds, and plants for our installation is slowly forming into a colorful rainforest.

Yesterday morning, guest artist Li Ezzell helped our Campers create paintings of Earth as seen from space. Today, we are focusing on hot climates and will continue to explore different environments in the days to come.
